

How to set up YouTube TV

Streaming with the YouTube TV app is easy. There are two ways to access your favorite TV shows, movies, and sports coverage.

Setting Up YouTube TV on a Smart TV

1 Download the YouTube TV app to your smart TV.

2 Open the app and an activation code will pop up.

tv.youtube.com/start

3 Go to a web browser on your phone or computer and type in tv.youtube.com/start.

4 Log into your Google Account, type in the activation code, and click "Allow."

5 Browse content to find what you want to watch.

Casting YouTube TV to Any TV

1 Grab an external streaming device like a Chromecast, Roku, Apple TV, or Amazon FireStick.

Your device may look different than the ones shown but the steps remain the same.

2 Check to ensure that your phone or desktop is connected to the same Wi-Fi network as your external streaming device.

3 Open the YouTube TV app on your phone or open the YouTube TV homepage on your desktop.

4 Choose what you would like to watch and click "Cast" in the video player.

5 From a list of available devices, choose the device you want to cast to and your chosen content will begin to play.
